

Research Inspired Teaching

Students at UW have joined a multi-disciplinary academic community, which is inspired by a variety of approaches, experiences, perceptions and engagements with contemporary research

- seek to ensure that all student learning is enriched by engaging with the challenges and excitement of cutting edge research
- students' enhance and develop their employability skills by undertaking research projects themselves

Designing Curricula

Course teams are advised to embed the acquisition of research skills into curricula from level 4 and to consider the introduction of Research Experience Modules.

Examples: Comparative Animal Physiology, History Work Experience

Involving Students in a Community and Culture of Researchers

The University produces a 'Quick Guide' to staff – student research opportunities and events each year – as a one-page handout and on the web.

Covering for example: SAPs VRA, VTDA, Images of Research exhibition, Post-graduate conference, Hive Academic Publication Week

Celebrating Research

Continue to encourage courses, institutes, subjects and university as a whole to celebrate research at all levels

Examples - Final Shows on Creative Arts Courses, Student Conferences, celebrating staff publications via social media
Produce poster displays or IS abstracts booklets
Greater visibility of Vacation Research Assistantships work

Plan for the University to hold a Celebrate Research week each year starting 2018-9

Roles for researchers in enhancing student learning

Organises a package of activities to support post-graduates and other research staff gain HEA Associate Fellowship whilst supporting undergraduate learning.

University Researchers Teaching Award

Involving a range of activities already provided to support post-graduate researchers to enhance student learning and enhance post-grads employability.

Getting links onto agendas - building bridges

Share and Inspire Session

- We aim to produce a Share & Inspire session jointly between ISE and IHCA in December
- We will aim to showcase some good examples of linking Learning and Research that might inspire others

That L and T reports and Research reports both make reference to research inspired teaching

Sets up a Student Research Journal
